Simple set of tools to easily manage your documents and images. What's in this version : Add remote scan documents to My scans. Improvements : - Fix issue where the user could not choose the remote server. - Fix issue with the QR code not showing the scan. User manual : This is a portable version of the Tool, you can keep it in your USB attached to your device. No installation is required. The Tool needs to connect to the device and to the network it is using in order to be able to use it's functions. If the network connection is bad or not working

for some reason, it will be unable to connect and won't be able to use any of the tools. With a network connection, the Tool will detect if you are using the server or not. If you are using a scan server, it will require you to type the server name and the password. When you are done, it will ask you if you want to save the documents on the server or not. When you do this it will create a folder called My Scans on the server that contains the created scans and they will be accessible on the cloud. When you do not want to save them you just have to press OK. If you want to read them later you have to go to My Scans, choose the file

and press Open. If the server is not connected, you will be able to use the tool but it won't be able to access the documents or images that you will have saved. In order to use the Tool you have to turn on your device and connect it to the network that is using the scanner. You need to be connected to the network for at least 3 seconds. You can disconnect the Tool at any time but keep in mind that you won't be able to use the scanner if you disconnect it from the network. If you don't use the Tool to scan a document, the document will just be saved on the printer's internal memory and not on the server. If you want to be able to see the

document anywhere you can go to My Scans, choose the file and press Open. [Canon Pixma MX712] Edit images and add notes for Canon PIXMA MX712 A useful tool that was designed in order to provide
