BJCustomSoft Installer Crack + Full Product Key

The setup program creates a new shortcut to the application which can be accessed from the Start menu. Create separate.exe files from your different.dll files and merge them into one setup file. Features .exe files can be created from any.dll or.so file. Add as many different.exe files and.dll files as you like. Select the files you want to include in the setup file and choose the installation path. Create shortcuts to your executable files from the Start menu. Only one setup file can be saved at the same time. Instructions: 1. Open the software and click the Convert/Merge button. You will see an empty form. 2. You can add as many.dll files and.exe files as you like in the form. 3. Right click any file and click "Add". 4. You can select the destination path for your executable files. 5. You can also choose to make a shortcut for your executable files and put them on the Start menu. 6. You can save your settings and close the program. Cracked BJCustomSoft Installer With Keygen changes your executable files to the.exe files without changing their original.dll files. How to Install: You should install this software according to your OS system requirements, see additional details here If you are running Windows XP or earlier, download the file [Minimum_Intel_Windows_XP_System_requirements] (7.9MB) If you are running Windows Vista or later, download the file [Minimum_Windows_Vista_System_requirements] (9.8MB) If you are running Windows 7 or later, download the file [Minimum_Windows_7_System_requirements] (9.4MB) Install to a Network Drive If you want to install this software to a network drive, go to the Start menu and right click the Network folder. Select "Map Network Drive". Navigate to your network location and click "OK". Navigate to the software folder and click "Install".
