However, more sophisticated software can also get the job done with minor tweaking. In that regard, it's worth the price if you're working on a lot of images at once (or if you're a collector). Photoshop users who edit a lot of photos a day can benefit from other photo editing software. One of the best graphics application is Photoshop. Sharing online is typically started with a side button to the left of the image file, but in Photoshop CC, it starts with a right-click. In either case, select File > Share > Online or File > Save for Web > Website. This opens the Collaborative Cloud page, where you can add a link to your original document. If you'd rather take a snapshot labeled URL, you can open the Sharing dialog (Photoshop CC) and from the toolbar, choose New > URL > Web. This will open the Online panel, where you can use the standard three options for adding a link to your image, much as you would for a new photo. You can save to the Cloud by selecting File > Save for Web > Website. This opens the Save for Web dialog, where you can still add a title, description, and a link. But while you can control the size, format, and other settings, you can't share the image as you can when you save to a local folder. Yet, accessing Cloud files is easy.
